Patterns & colors, perfect for every application!

Be sure to consult our friendly sales staff with any application questions.

FLEXI-TILE is a flexible interlocking floor tile that has been developed to provide an "instant" self-laying floor surface. Can be used in a wide variety of residential and commercial applications such as: Homes, Patios, Garages, Basements, Car Shops, Firehouses, Schools, Gymnasiums, Showrooms, Stores, Work Shops, Warehouses, & MORE! Tiles "lock" firmly together in a matter of minutes using only a rubber mallet. A complete floor can be laid or lifted in a short amount of time, without the need for expert labor or adhesive, thereby giving you significant saving in the total cost of a finished floor area.
